Variety Description

Variety SARGUS

Species	Perennial ryegrass
Botanical name	Lolium perenne
Ploidy	4
Seeding rate	25-30 kg/ha
Distance between rows	as cereals
Sowing period	until September
Sowing depth	1-2 cm

Agronomische Kennzahlen*:

Development after sowing	7
Tendency to winterkilling	4
DM-yield total	6
DM-yield first cut	4
DM-yield in aftermath	7
Persistence	5
Sward density	5
Tendency to lodging	5
Inflorescence during regrowth	3
Susceptibility to rust	3
Beginning of flowering	2

Clarification of figures*:
1: very early, very low / 5: medium / 9: very late, very high

Variety description

SARGUS is a new tetraploid variety of perennial ryegrass in the early maturity group with a clear focus on forage quality. The variety stands out for its exceptionally strong early growth and high yield potential. As one of the last officially recommended varieties from the peatland trials, SARGUS is a proven performer. Also noteworthy are its very good rust tolerance, outstanding quality characteristics, and a balanced yield distribution throughout the first cut.

Most important characteristics

Starke Massebildung im Anfang
Hohe Erträge in den weiteren Schnitten
Sehr winterhart
Suitable for loamy soil
Gute Rosttoleranz

Usage

(L) variety
