### Variety description

SANTHICA 70 is a hemp variety in the medium-late maturity group which is used as a premium fibre variety. SANTHICA 70 has a very high straw yield along with a high fibre content. Maximum yields in relation to fibre can therefore be achieved. SANTHICA 70 is not well suited to grain production. Like in all hemp varieties used for this purpose, the THC content of SANTHICA 70 lies below 0.2%. The CBD content is also in the low range.

### Most important characteristics

Medium-late maturity group

THC < 0.2%

Premium fibre variety

High fibre content and fibre yield

### Usage
