

Variety Description

Variety

ULTRA

Species	Perennial ryegrass
Botanical name	Lolium perenne
Ploidy	2
Seeding rate	30 g/m ²
Distance between rows	Broadcast seeding
Sowing period	March to September
Sowing depth	Superficial

Agronomic figures:

Ornamental lawns	(-)*
Recreational lawns (RL)	6*
Hard-wearing lawns	7*
Landscape lawns	5*
RL sward colour	7**
RL leaf fineness	6**
RL sward density (SD)	6**
RL SD within the variety	5**
Suitability for recreational lawns	6**
Suitability for hard-wearing lawns	7**
Suitability for landscape lawns	5**

Clarification of figures:

* 3: limited suitability / 6: suitable to well-suited / 9: extremely suitable

** 1: very early, very low / 5: medium / 9: very late, very high

Variety description

The ryegrass variety ULTRA exhibits a medium- to dark-green colouration along with fine leaves. Thanks to its high rate of coverage, this variety suppresses weeds very effectively and is therefore ideal for use in reseeding mixtures as well as the establishment of new sites. ULTRA is universally applicable and shows its strengths particularly in recreational and hard-wearing lawns.

Most important characteristics

Dark-green colouration
High rate of coverage
Good weed suppression
Suitable for recreational and hard-wearing lawns
Universally applicable in reseeding and new sites
