

Variety Description

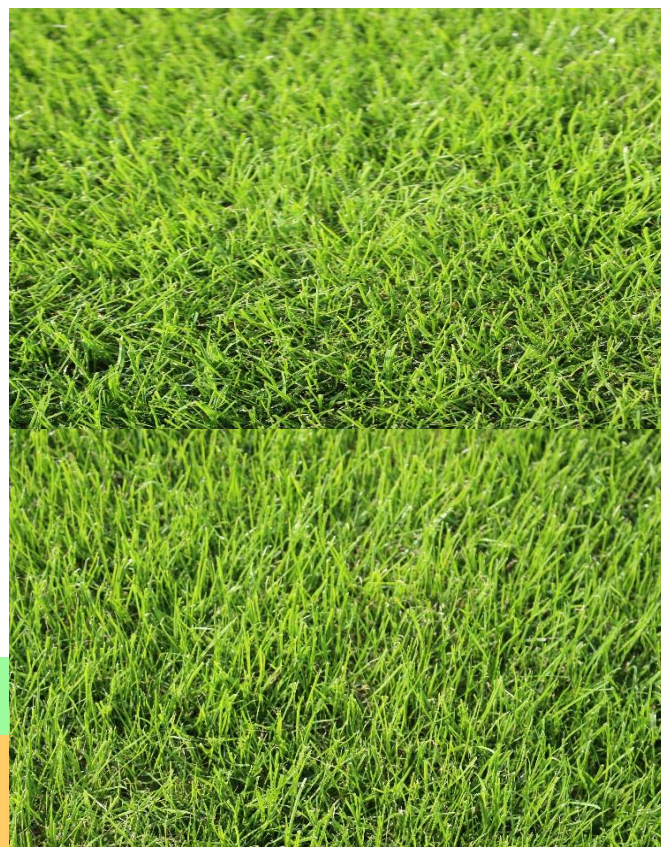

Variety

BELLEVUE

Species	Perennial ryegrass
Botanical name	Lolium perenne
Ploidy	2
Seeding rate	30 g/m ²
Distance between rows	Broadcast seeding
Sowing period	March to September
Sowing depth	Superficial

Agronomic figures:

Ornamental lawns	(-)*
Recreational lawns (RL)	8*
Hard-wearing lawns	8*
Landscape lawns	4*
RL sward colour	5**
RL leaf fineness	3**
RL sward density (SD)	7**
RL SD within the variety	9**
Suitability for recreational lawns	8**
Suitability for hard-wearing lawns	8**
Suitability for landscape lawns	4**

Clarification of figures:

* 3: limited suitability / 6: suitable to well-suited / 9: extremely suitable

** 1: very early, very low / 5: medium / 9: very late, very high

Variety description

Thanks to its excellent quality, BELLEVUE perennial ryegrass is among the higher-end lawn grass varieties. Its good sward density and high durability are particularly noteworthy characteristics. They make this variety a good candidate for both recreational and hard-wearing lawns, with a grade of 8 (extremely suitable) in the German classification of lawn seed mixtures, or RSM. BELLVUE is also characterised by a considerable level of weed suppression due to these factors. Its medium-green colouration makes this competitive variety suitable for reseeding in existing lawns.

Most important characteristics

High sward density
Very high competitive vigour against weeds
Well-suited for reseeding mixtures
Very well-suited for recreational and hard-wearing lawns
