

Variety Description

Variety

CANGOU

Species	Perennial ryegrass
Botanical name	Lolium perenne
Ploidy	2
Seeding rate	25–30 kg/ha
Distance between rows	as cereals
Sowing period	until September
Sowing depth	1-2 cm

Agronomic figures*:

Development after sowing	4
Tendency to winterkilling	6
DM-yield total	6
DM-yield first cut	6
DM-yield in aftermath	6
Persistence	6
Sward density	5
Tendency to lodging	5
Inflorescence during regrowth	2
Susceptibility to rust	5
Beginning of flowering	5

Clarification of figures*:

1: very early, very low / 5: medium / 9: very late, very high

Variety description

CANGOU is a high-yielding diploid variety of perennial ryegrass with outstanding yield security and even yield distribution. It exhibits good sward density and high persistence. A particularly important characteristic of this variety is extremely low inflorescence during regrowth, which ensures high feed quality.

Most important characteristics

High yield security
Even yield distribution
Good feed quality
Low inflorescence during regrowth
High persistence

Usage
